

# FLUID

## The Power of One

The new Fluid Power System from Bretford can **power up to four tables with eight computer stations from a single outlet**, without an electrician, without the clutter of individual power strips, and without the expense of hardwiring.

# The New Alternative

Hardwiring tables into a building's infrastructure is an expensive and inflexible solution. Using individual power strips allows for flexibility but requires one plug for each cord, which creates clutter and may cause an overload. With Bretford's Fluid Power System, you have a new option that provides the best of both worlds. **Safely connect and power rows of up to four tables with eight computer stations from a single plug** that can be used in any standard electrical outlet.

# No Electrician Required

Fluid is designed to be installed by anyone. No special skills needed. **No tools required.** There's no cost for an electrician and no need for building modification. So, **Fluid costs less than half of what it costs to hardwire.**

# A One Plug Solution

With Fluid, **you can continually reconfigure a room to suit the changing needs of your space.** Because the Fluid system powers from standard outlets and the tables can be connected in any order, **it's a truly flexible solution.** You don't have to worry about multiple plugs or finding numerous outlets to support your configuration.

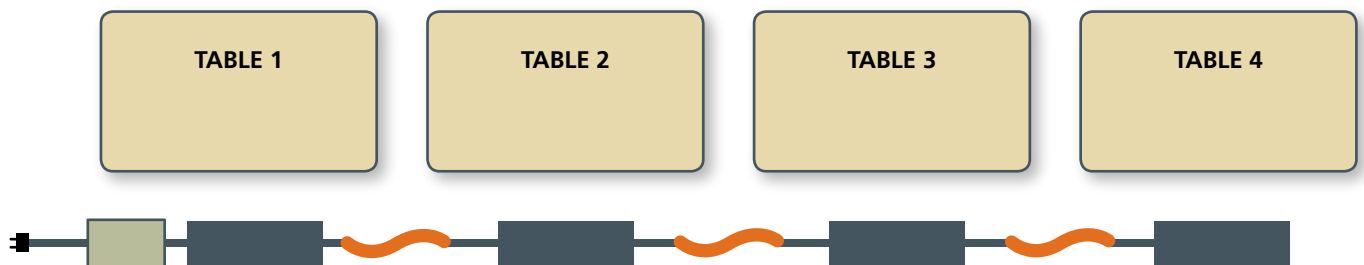

# Recognizably Smart

Fluid has **built-in sensors** that shut the system down when a surge or overload is detected. With safety features like this, it's no wonder **Underwriters Laboratories recognizes Fluid for safety.**

# How to Order Fluid

-  Order one 4-outlet power strip for each table
-  Order three jumpers for each row of four tables
-  Order one power infeed cable for every row of tables (maximum four tables per row)

## Power Strip

Model #	Description	List Price
DPCF4	4 outlets with 12" cord	\$130

## Jumper Cables

Model #	Length	Description	List Price
DPJ38	38"	For 30" and 36"W tables	\$55
DPJ54	54"	For 42" and 48"W tables	\$55
DPJ62	62"	For 60"W tables	\$60
DPJ74	74"	For 66" and 72"W tables	\$60
DPJ86	86"	For 84"W tables	\$60

## Power Infeed Cable

Model #	Description	List Price
DPP120	Power Infeed Cable with 10' cord	\$236

# Start the Flow with a Few Twists

Simply attach Fluid to the existing power cutouts on many of our Basics, Collections, and Library tables. Because it uses existing mounting hole patterns, **Fluid can be retrofitted to work with older installations as well.**

**Basics:** Connections, SmartDeck, Quattro, and KR Series tables

**Collections:** Here, C-Base, and T-Base Series training tables; PE and Trü conference tables

**Library:** Legacy Technology Series tables and carrels

**Bretford's Fluid Power System is now available for order.**
