

BRETFORD BASICS™

CONNECTIONS FLAT SCREEN WORK CENTERS

The Connections Flat Screen Work Centers were specifically designed to accommodate a flat screen computer monitor. These tables are great for classroom use since the monitors are slightly recessed allowing students to see the teacher at the front of the room.

FEATURES

- When space is an issue choose a 24" deep work surface which requires less room, allowing five rows of tables to fit in a space that would hold four 30" deep tables. Choose a 30" deep work surface when using larger equipment and more space is required on the monitor shelf.
- A separate work surface for the flat screen monitor allows you to adjust the height to best suit your needs.
- The monitor work surface on 24"D tables measures 9-1/2"D and on 30"D tables 15-1/2"D. The monitor work surface adjusts in height from 23-31" in 1" increments allowing for the monitor to be lowered below the keyboard work surface.
- The keyboard work surface measures 13"D, is adjustable from 24-32" in 1" increments so the keyboard can be set at the perfect typing height.
- A CPU holder comes with each table, 72"W table includes two CPU holders. Standard CPU tower holders adjust for computers 6-1/2" to 11-1/2"W x 17"D, no taller than 19". Slim CPU tower holders (MT models) adjust for computers 3-1/2" to 5-3/4"W x 17"D, no taller than 19".
- The Flat Panel Work Centers are available in 36" (one computer) and 72" widths (two computers.)
- Attractive Grey laminate tabletop trimmed with bullnose edge band in your choice of four trim colors, Quartz grey, Cardinal red, Polo green, or Topaz blue. Also available for special order in any Bretford paint, trim and laminate option.
- Tops feature metal threaded inserts on the underside to attach the leg assemblies to for a metal to metal connection that adds strength and greatly reduces the possibility screws will strip or fall out over time.
- Bases are constructed of 14-gauge steel tubing which consists of 30% post-consumer recycled content and finished in an environmentally friendly grey powder paint which withstands years of use.
- Complies with the GREENGUARD Environmental Institute's GREENGUARD Children & Schools Indoor Air Quality standards, contributing to points toward Leadership in Energy and Environmental Design (LEED) Certification.
- A perforated cord management bin also acts as a modesty panel which runs the entire width of the table under the monitor work surface.
- A metal stiffener is located under the keyboard work surface and all connections on the table are metal to metal.
- Two integrated security points are built into the table allowing for the use of a security device to secure your monitor to the table.

A HIGHER FORM OF FUNCTION

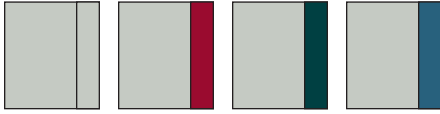

BRETFORD

STANDARD COLOR/FINISH

Base/Tabletops: Grey powder paint/Grey melamine

Trim & Toe Caps: Available in Cardinal (GMC), Topaz (GMT),

Polo (GML) and Quartz (GMQ)

PREMIUM COLOR/FINISH OPTIONS

Connections tables may be special ordered in any of Bretford's premium finish offerings. For a complete listing of premium finishes please visit us on the web at www.bretford.com.

SOFTWIRED POWER OPTION

ECF6 6-Outlet Power Strip (1 each table)

NOTE: The cord management bin on Flat Screen Work Centers is not large enough to support the Power Infeed on the Fluid Power System and Fluid Power should not be used with these tables.

SUGGESTED SPECIFICATIONS

Keyboard work surface is height adjustable from 24-32" in 1" increments. The monitor work surface is height adjustable from 23-31". The width is 36"w or 72"w depending on the model. Table tops are constructed from 1" thick laminate furniture board, 45 pound density. Metal threaded inserts are installed into the underside of each top so the base is attached with a metal to metal connection. The work surface mounts to a steel top support plate which is welded to the legs. The legs are constructed from 14-gauge steel and the upper leg fits over the lower leg for height adjustability. The upper leg section is 1-1/4" x 2" steel tubing and the lower leg is 1" x 1-3/4". A modesty panel is constructed from 18-gauge steel and runs the width between the upper legs. The CPU Harness is constructed from steel and mounts under the table work surface. All steel parts are constructed with "prime" steel which has a 25% to 35% post-consumer recycled content. Laminate substrate consists of an average 70% post-consumer recycled content. Table shall be GREENGUARD INDOOR AIR QUALITY CERTIFIED®. 36"w unit comes with one CPU Holder except the 72"w models which come with two. Standard CPU Holder supports computers 6-1/2"-11-1/4"w x 19"h, Slim CPU Holder (MT models) supports computers 3-1/2"-5-3/4"w x 19"h. Models are finished in an environmentally friendly Grey Mist powder paint, and ship ready to assemble.

MADE IN THE USA

All Connections series tables are made at one of Bretford's Chicago area manufacturing facilities using union labor.
