

PERIODICAL SHELVING

Bretford offers two types of periodical shelving for library applications: Display/Storage and Fixed.

- Periodical Display and Storage Shelving features a slanted shelf that lifts up and slides back to reveal an additional flat shelf for storing back issues.
- Fixed Periodical Display Shelving allows for oversized periodicals.
- Slanted shelf design reduces cover glare while increasing readability.
- Optional compression bar on shelving keeps newspapers in place and organized.
- Available in single- or double-faced units to efficiently utilize floor space.

FIXED PERIODICAL DISPLAY SHELVING

Fixed Periodical Display Shelving is designed and constructed for complete modularity and utilizes the starter/add-on concept. Each wood veneer starter unit including hardware measures 37¹/₄"W and each wood veneer add-on unit including hardware measures 36¹/₁₆"W. Each laminate starter unit including hardware measures 37⁵/₁₆"W and each laminate add-on unit including hardware measures 36³/₃₂"W.

Periodical Display Shelf:

The Fixed Periodical Display Shelf is constructed using 20-gauge steel and is able to fit inside of all 10 or 12" deep shelving units. Front retention lip is 3/4" deep with a 35 degree return flange. Shelves attach using four solid steel pins with a Black finish. For safety purposes, shelf pins have a center collar to make the pins impossible to pull out once the shelf is installed.

Number of shelves per face are as follows:

- 42" and 48" high units come with two shelves and a wood/laminate top
- 60" high units come with three shelves and a wood/laminate top
- 72" and 84" high units come with four shelves.

Shelf Dimensions:

34¹³/₁₆"W x 14³/₁₆"H x 1¹/₂"D

Wood End and Middle Panel:

All wood upright panels have stained finish. Edge treatments are constructed using solid hardwood radius bull-nosed treatment

Laminate End and Middle Panel:

All laminate upright panels are covered on both sides with high-pressure laminate. Edge treatments shall be constructed using a 3mm T-mold edge.

Compression Bar:

The optional Compression Bar can be used on the Fixed Periodical Display Shelves. Compression Bar is constructed of steel and finished in powder paint.

PERIODICAL DISPLAY AND STORAGE SHELF

Periodical Display Shelving is designed and constructed for complete modularity and utilizes the starter/add-on concept. Each wood veneer starter unit including hardware measures 37¹/₄"W and each wood veneer add-on unit including hardware measures 36¹/₁₆"W. Each laminate starter unit including hardware measures 37⁵/₁₆"W and each laminate add-on unit including hardware measures 36³/₃₂"W.

Periodical Display and Storage Shelf:

The Periodical Display and Storage Shelf consists of one flip-up periodical display shelf which is constructed using 20-gauge steel. Can only be used with 15" shelf capacity. Front retention lip is 3/4" deep with a 35 degree return flange. Hinge brackets are made of 14-gauge steel and attach using #12 x 1/2" wood screws. Also included is one 15" deep steel flat shelf per flip-up periodical display shelf.

All 15" deep flat shelves are constructed of 20-gauge steel and have a welded 18-gauge steel stiffener which also acts as a book support channel. Each shelf is able to support 150 lbs. with zero deflection. Each shelf measures 1/4" high at the front and has 1/4" high book stop at the back. Shelves attach using four solid steel pins with a Black finish. For safety purposes, shelf pins have a center collar thus making the pins impossible to pull out once the shelf is installed.

Number of shelves per face are as follows:

- 42" and 48" high units come with two shelves and a wood/laminate top
- 60" high units come with three shelves and a wood/laminate top
- 72" and 84" high units come with four shelves.

Shelf Dimensions:

34¹³/₁₆"W x 15³/₈"H x 15³/₈"D

Wood End and Middle Panel:

All wood upright panels have a stain finish. Edge treatments are constructed using solid hardwood radius bull-nosed treatment.

Laminate End and Middle Panel:

All laminate upright panels are covered on both sides with high-pressure laminate. Edge treatments shall be constructed using a 3mm T-mold edge.

End Panel Depth	Shelf Depth
